About Me

I am a final year BCA student at Poornima University with experience in Python Full Stack Development. I specialize in both frontend and backend development and have hands-on experience with Java and C. I am currently doing an internship at Linux World Pvt. Ltd. to gain real-world project experience.

Skills

- Languages: Python, Java, C, HTML, CSS, JavaScript

- Web Technologies: Streamlit, Flask, Bootstrap

- Databases: SQLite, MySQL

- Tools: Git, Linux, VS Code, Terminal

Projects

1. Streamlit Car Rental App

   - Built a rental system with dynamic pricing and booking features using Streamlit.

2. Messaging Automation System

   - Created tools to send SMS, email, and WhatsApp messages using Python libraries.

3. Smart Live Queue System (In Progress)

Shankar Lal Bana - Portfolio

- A real-time queue tracking system for local stores to reduce wait times.

Internship

Company: Linux World Pvt. Ltd.

Role: Python & DevOps Intern

Details: Working on automation and smart queue systems with a focus on Linux and scripting.
